LATEST PROJECTS

Memnon

[Live Site](#) | [Source Code](#)

Built a local-first voice capture app for teachers: iPhone recording, on-device whisper.cpp transcription, and structured Markdown in under 60 seconds. Ships an MCP server for querying the note history.

Technologies Utilized: TypeScript, Python, React, Node.js, whisper.cpp, MCP, OpenAI API, Ollama

Teach League

[Live Site](#) | [Source Code](#)

Developed and deployed an AI-powered curriculum planning and gradebook platform that assembles standards, accommodations, and trusted instructional materials, with multiple Google API integrations.

Technologies Utilized: React, Redux, Node.js, Express, Firestore, Firebase Auth, Classroom API, Gemini API

Missing Voices

[Live Site](#) | [Source Code](#)

Built a text analysis tool that surfaces perspectives absent from student research and writing.

Technologies Utilized: TypeScript, React, Node.js

leetrboo

[Live Site](#) | [Source Code](#)

Engineered a full-stack leaderboard app to manage competitive events with secure OAuth authentication.

Technologies Utilized: HTML, Bootstrap, CSS, TypeScript, React, Node.js, SST, OAuth, PostgreSQL, AWS

EXPERIENCE

Computer Science Teacher, Jefferson Academy Charter School

June 2025 - Present

Teach the secondary computer science pathway to grades 8-12, including AP Computer Science Principles and AP Computer Science A. Build internal tooling for rostering and progress reporting.

Software Engineer, ReSight Inc.

December 2024 - June 2025

Built report generation and data collection features in React and TypeScript. Deployed and monitored applications on AWS. Contributed to code reviews and technical documentation.

Software Engineer, Freelance

December 2019 - Present

Design and develop custom web solutions for client needs, from consultation through responsive delivery.

Co-Organizer, Boulder JavaScript Group

June 2024 - Present

Co-organize monthly JavaScript meetups: venues, logistics, sponsorships, and speaker programming.

Computer Science Teacher, September School

December 2015 - December 2024

Taught a range of computer science classes. [Built an app](#) that automated data collection and generated individual progress reports for every student, saving the school \$4,480 and nearly 150 hours of educator work. Selected for the 21st Century Teacher Cohort to lead classroom technology integration.

EDUCATION, LICENSURE & RECOGNITION

2026 Responsible AI Fellow, Computer Science Teachers Association (1 of 15 selected nationally)

Nucamp honor-level certification in frontend web and mobile development, React and React Native

Lewis & Clark College Master of Arts in Teaching | St. John's College Bachelor of Arts in Liberal Arts

Colorado Professional Teacher License #240550

TECHNICAL COMPETENCIES

Languages: TypeScript, JavaScript, Python, Ruby, Semantic HTML, CSS, SQL

Frontend: React, React Native, Redux, SolidJS, Mantine UI, Bootstrap, JSX

Backend and Data: Node.js, Express, Ruby on Rails, PostgreSQL, Supabase, Firebase, GraphQL, REST APIs

AI and Agents: Model Context Protocol (MCP), OpenAI API, Google Gemini API, Ollama, whisper.cpp

Infrastructure: AWS, SST, CI/CD, Git, GitHub
